EXECUTIVE INSIGHT REPORT • Q4

HealthConnect Rwanda

Scaling Digital Healthcare Infrastructure Across Rural & Urban Sectors

National Digital Health Assessment & Performance Strategy

EXECUTIVE OVERVIEW

Platform Reach & System Impact

82

Connected Facilities

Hospitals, health centers & posts nationwide.

90.5%

Digital Maturity Score

High interoperability and system readiness.

73.8%

Decision Integration

Directly informs resource allocation.

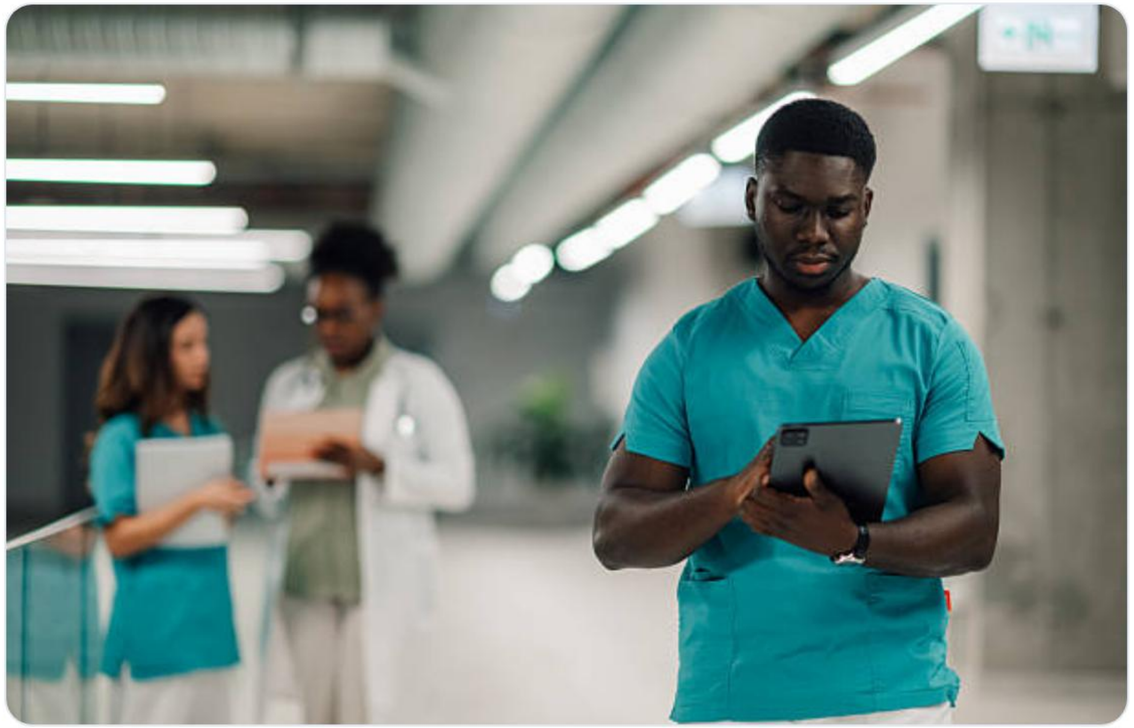

OPERATIONAL CONTEXT

Modernizing Healthcare Operations

Unified Patient Records
Seamless clinical data flow across primary and tertiary providers.

Real-time Surveillance
Active tracking for priority epidemiological vectors.

Resource Optimization
Data-driven pharmaceutical distribution & supply chain logistics.

CORE PILLAR 01

Interoperability & Governance

Connecting national reporting structures to local point-of-care delivery systems.

FRAMEWORK

Architectural Foundation

Standardized APIs

Seamless REDCap and HMIS data synchronization protocols.

Data Governance

Strict patient confidentiality and national security compliance.

Local Support

Dedicated technical teams maintaining zero server downtime.

MATURITY BENCHMARK

Technical Excellence Score

90.5%

Digital Maturity Index in Interoperability

Ranked in Level 4 (Optimized) for cross-departmental data exchange and real-time response capability.

EXPANSION ROADMAP

Disease Surveillance Integration

PHASE 01

Malaria & TB

Active surveillance scaling.

PHASE 02

HIV & Hepatitis

Long-term care tracking.

PHASE 03

NCD Screening

Chronic illness management.

INFRASTRUCTURE INTEGRATION

Facility Coverage Network

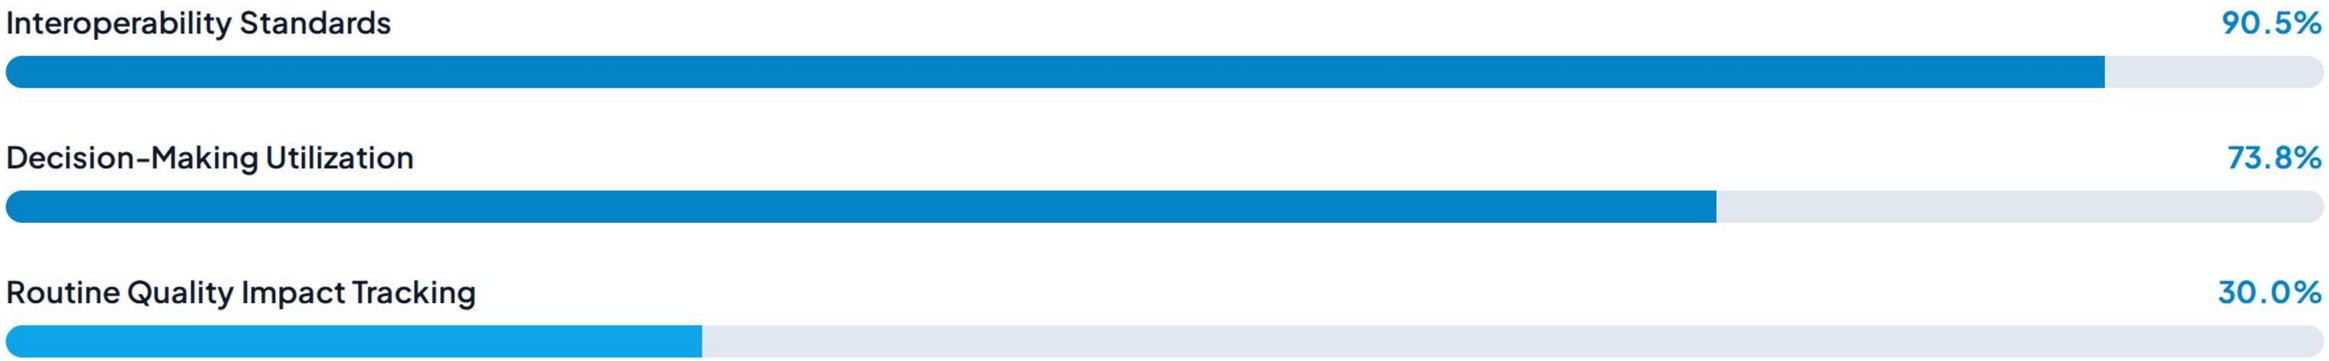

Connecting Rural Posts to Urban Hubs

Bridging operational gaps between referral hospitals and community clinics through unified reporting standards.

- **Real-time Sync:** Instant referral processing.
- **Equitable Access:** Diagnostic tracking in remote zones.

QUALITY ANALYTICS

System Quality Metric Coverage

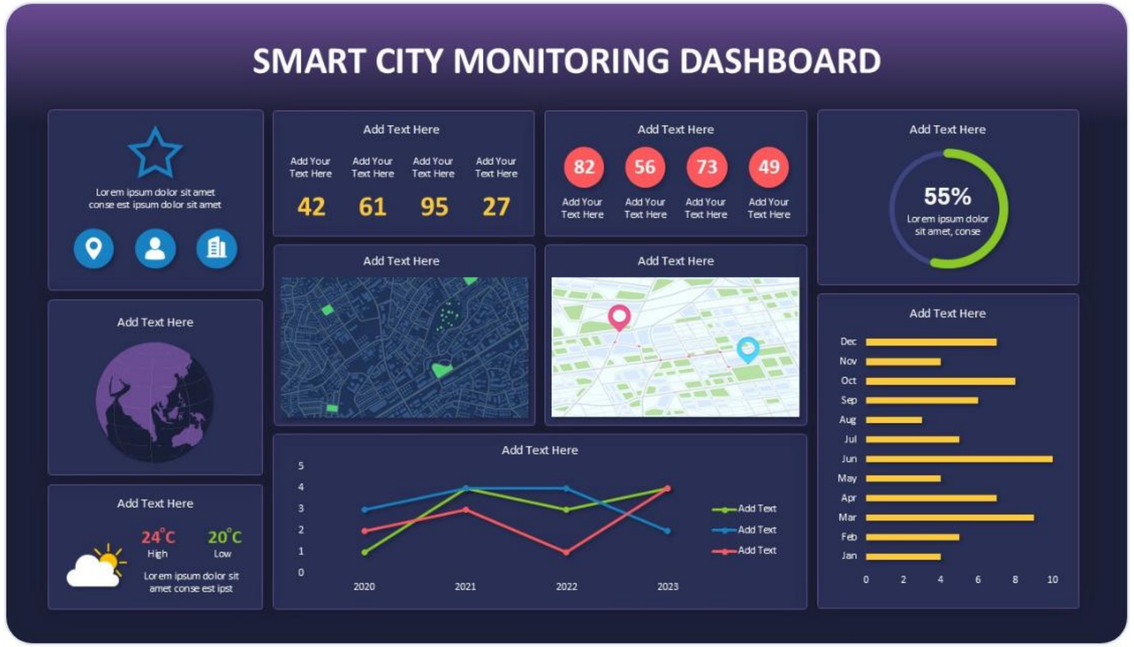

DIGITAL INTELLIGENCE

Data-Driven Leadership

Optimized Health Intelligence

Empowering ministry leadership and local managers with actionable operational insights.

Key Target: Elevating routine health outcome tracking from 30% to 75% across all sectors.

ACTION PLAN

Key Executive Recommendations

Capture Care Quality

Expand HMIS indicators to track NCD outcomes.

Workforce Training

Upskill regional data managers on REDCap platforms.

Infrastructure Scale

Strengthen hardware resilience in health posts.

Policy Framework

Institutionalize national digital health governance.

Thank You
